## 90 MINUTES THAT MATTER

### » Religious Freedom and the Nation's Founding in Philadelphia: Reflections on America

**PA NEW** Philadelphia is widely understood to be the birthplace of American democracy, but it is also the birthplace of American religious freedom. The early city was one of the most religiously diverse locales in colonial America, and the experience of diversity influenced discussions about founding principles. Class will highlight a public history initiative by the Dialogue Institute, which aims to use stories of diversity to stimulate dialogue about American identity and belonging today.

*David Krueger, Executive Director, Dialogue Institute, Temple University*

### » Development of Latin America-China Relations in the 20th and 21st Centuries

**NEW** Coverage on China's presence and influence in Latin America has increased. Sometimes, China is presented as a tough competitor to U.S. influence. Other times, as a player that has filled in gaps that traditional partners have left. What is China's history and role in Latin America? Is it one in which the Latin America-China relationship mirrors a new form of colonialism or dependency? What are the interests and objectives at hand in this relationship?

*Victoria Chon Ching, Non-resident Fellow, FPRI and The Atlantic Council*

### » Christian Nationalism and Its Challenges to Faith and Life in a Diverse Democracy

**NEW** Get an overview of the debates surrounding the relationship between religion and politics in U.S. history, with a focus on the emergence of a movement known as Christian nationalism. While its advocates claim to be restoring faith to American public life, it tends to impose a narrow expression of Christianity that erases the separation of church and state and undermines democracy by marginalizing religious (and non-religious) voices that do not conform.

### » Revolution and Decorum: The Enlightenment in Britain and America

**NEW** Explore the impact of the eighteenth-century Enlightenment on Britain and her North American colonies. British thinkers contributed much of the intellectual foundations for the Enlightenment, and these ideas had a significant influence on Britain and her colonies. ### » The American Revolution: A Revision

 Americans are taught the history of the founding of our nation in elementary school. Unfortunately, we hear only one side of the story; there is another. We will examine the causes and consequences of this struggle not only from the colonists' perspective but also from the Mother Country's. Was George III really a tyrant? Was "life, liberty, and the pursuit of happiness" the real motivation? Address these and other questions about this struggle.

Consider those dramatic events through the reigns of James I, Charles I, Oliver Cromwell, Charles II, James II, William and Mary, and Queen Anne.

### » The Presidency of Jimmy Carter

**NEW** Generally regarded as a weak, ineffectual president, but having a towering, post-president impact on health and disease-extermination programs in developing countries, Carter's presidential record stands out under competent, critical biographers analyses (i.e., Kai Bird, Jonathan Alter) as "exceptionally consequential" and "exceptionally productive," nationally and internationally. His record in government deregulation, social legislation, foreign policy, international trade, U.S. strategic military defense support this revisionist view.

## » Zelda Fitzgerald, Doomed Princess of the Jazz Age

Zelda Fitzgerald was the embodiment of the Roaring 20s. Her husband, Scott Fitzgerald, himself, christened it the Jazz Age. They rode the crest of the 20s from its glamorous excess to its guttering, tragic final phase. Zelda has been portrayed as the unstable foil of Scott's great talent. Yet, she was an artist in her own right, a ballet dancer and a writer. She was the quintessential Flapper, beautiful, risk-taking, a proto-feminist. Her life, and Scott's, will be explored. Join us for tea and scones following the lecture.
